RFID Technology and Your Business

Radio Frequency Identification (RFID) is a method of identifying unique items using radio waves. RFID is what's happening now in package tagging, growing at a rate of 46% a year. This technology can improve your company's efficiency and make your business more cost competitive, both domestically and internationally. RFID will soon be mandated by Wal-Mart, Target and the Department of Defense for all vendors. RFID can be applied to supply chain management, item/asset identification, warehouse management and shipping container security.

This training seminar will provide you with the vital information needed to get RFID started in your business.

Who Should Attend?

- Company Executives
- Consultants
- IT Managers and Developers
- IT Solution Providers
- Supply Chain/Operations Professionals

Event Topics

The program will be fast-paced, information packed and contain many live demonstrations.

Topics to be covered during the training session include:

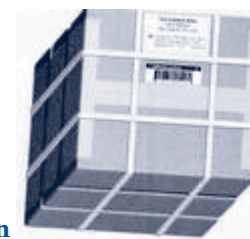

- RFID Technology Application and Overview
- Passive & Active Tags
- EPC Global Standards
- DoD Mandates
- Wide Area Workflow
- Business Benefits & Opportunities
- RFID Material Tagging & Guidelines
- Supply Chain Opportunities
- How to Get Started

Presenter

Mr. Frank DeWolf will be the trainer. Mr. DeWolf is Chief Operating Officer of the Center for e-Business and Advanced IT (eBizITPA) located in Knowledge Park at Penn State Behrend. Prior to joining eBizITPA, he held a number of senior management positions at GE Transportation Systems dealing with supply chain management and information technology. DeWolf is also a faculty member at Penn State Behrend, where he teaches e-Business and Supply Chain Management and directs the RFID Research Center.
