

Have you noticed what the cost of utilities is doing to **your** budget these days?

Please join us for a serious look at energy and the increasing need for energy management. This **FREE** workshop will cover the following:

- Economic impact of energy costs on your municipality and the region
- Challenges faced by municipalities in addressing energy costs
- Usefulness of utility bill analysis in evaluating your opportunities for savings
- The hidden messages in utility rate schedules
- Fundamentals of energy management planning
- Types and role of energy assessments
- Lessons learned by local municipalities

When: Tuesday, December 4, 2007

Where: Titusville Towne Square

Registration: 8:00am

Event: 8:30am - 10:30am

For more information please contact **Valerie Hearn** at valerieh@nwcommission.org or by phone at 814.677.4800 x124

YOU are invited!

Learn how to manage energy costs • Reduce the impact of escalating energy prices on your budget • Cut your utility costs by reevaluating facility operations.

- Discover how you are being charged on your utility bill • Learn what terms like kWh, kW, ccf, generation, and transmission mean • See how an energy management plan can help you prioritize energy improvements • Learn where energy prices are headed • Take control of your energy future • Establish priorities for future facilities management projects.
