The EuroMold trade show is the world-leading trade fair for moldmaking and tooling, design and application development. As the international meeting point of the industrial sector, it presents products and services, technology and impulses for tomorrow's markets. This annual event, based in Frankfurt, Germany, presents the entire process chain "From Design to Prototyping to Series Production". A unique fair concept that closes the gap between industrial designers, product developers, producers, suppliers, and end-users. For additional information go to: www.euromold.com
